Source

Statistics Finland. Deaths for years 1981-1999 have been received in the form of a single computer file. The data are supposedly compiled from annual publications on vital statistics: Väestömuutokset YYYY (Vital Statistics YYYY), Suomen virallinen tilasto (Official Statistics of Finland), Väestö (Population). YYYY+1:13. Helsinki: Tilastokeskus (Statistics Finland); YYYY+1.

Comments

(Deaths) Deaths for ages 100 and older were received later and stored in a different InArchive item (Fin.2001-03-15.D(1981-99, above 100).zip). Deaths are by Lexis triangles but there are no delayed returns of death certificates included as in paper publications of vital statistics (at least for the latest years). So there could be very small differences between published deaths and this computer file. How they have been handled by Statistics Finland while preparing this file? (KA). Deaths for 1999 are excluded as of RefCode 3.

Statistics Finland. Population estimates for years 1941-1995 (originally 31 Dec 1940-1994) have been received in the form of a computer file directly from Statistics Finland. They are supposedly compiled from annual publications on Finnish population structure: Väestörakenne YYYY (Population Structure YYYY), Suomen virallinen tilasto (Official Statistics of Finland), Väestö (Population). YYYY+1:6. Helsinki: Tilastokeskus (Statistics Finland); YYYY+1.

Comments

(Population estimates) In response to a request to provide census population for years when censuses were taken, Statistics Finland replied that such data are already included in this file. Some Finnish censuses are not, however, dated December 31st. Therefore, for such years, population estimates rather than census data are probably included. Population 1941-1995.
