31 Diciembre de 1970: Total National. Tomo III: Características de la Poblacion.
Madrid: INE.

Comments

(Census) Census counts 1970 (de facto & de jure population). The total de facto counts (by sex) come from Table 1.2. Table 7.2 gives de facto counts by sex and 5-year age groups, but does not include population of unknown age. Therefore, we inferred the population of unknown age by sex by subtracting the total shown on Table 7.2 from the total shown on Table 1.2 for each sex. We then redistributed de facto counts (Area=10) into 1-year age groups based on the age distribution of the de jure population (Area=20) within each 5-year age group. See also NoteCode=03.
