Centraal Bureau voor de Statistiek. Annual death counts by single age (0-107, 108+), year of birth, and sex, 1950-1979 (period-cohort parallelograms and Lexis triangles). Unpublished data received from Jolanda van der Meer at the CBS Netherlands.
Comments
(Deaths) Annual number of death by sex, single year of age, and birth cohort. Data are by period-cohort parallelograms for ages 0-99; by Lexis triangles for ages 98-107 and age 0 (lower triangle); and open age interval from rectangle 108+. Data for females for 1968 are classified by single year of age and birth cohort (period-cohort parallelograms) up to the age 107. Data neither show a category for deaths of unknown age nor any total.
Received via e-mail on 07 and 14 November 2001 from Jolanda van der Meer (jmrr@cbs.nl) at the CBS Netherlands.
